TABLE OF CONTENTS

Table	Page
1. Estimated Population of North Carolina by Color and Sex, 1918-1953..	9
2. Summary of All Reportable Communicable Diseases by year, 1918-1953	10
3. Reported Cases of Amebiasis (Place of Residence)	
A. By county and color, 1952 and 1953, with month of report, 1953..	13
B. By year of report and age, 1945-1953.....	15
C. By year of report, color, and sex with rates, 1945-1953.....	16
4. Reported Untreated Cases of Chancroid (Place of Report)	
A. By county and color, 1952 and 1953, with month of report, 1953..	17
B. By year of report and age, 1930-1953.....	20
C. By year of report, color, and sex with rates, 1930-1953.....	21
5. Reported Cases of Diphtheria (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953..	22
B. By year and age, 1930-1953.....	25
C. By year, color, and sex with rates, 1930-1953.....	26
6. Reported Cases of Encephalitis by County and Color, 1952 and 1953 with month of onset, 1953 (Place of Residence).....	27
7. Reported Cases of Gastro-Enteritis (Place of Residence)	
A. By county and color, 1952 and 1953, by type, 1953 onsets.....	28
B. By year and age, 1953.....	31
C. By year, color, and sex with rates, 1953.....	31
8. Reported Untreated Cases of Gonorrhea (Place of Report)	
A. By county and color, 1952 and 1953, with type and sex, 1953 reports.....	32
B. By year of report and age, 1930-1953.....	36
C. By year of report, color, and sex with rates, 1930-1953.....	37
9. Reported Untreated Cases of Granuloma Inguinale (Place of Report)	
A. By county and color, 1952 and 1953, with month of report, 1953	38
B. By year of report and age, 1945-1953.....	40
C. By year of report, color, and sex with rates, 1945-1953.....	41
10. Reported Cases of Infectious Jaundice (Place of Residence)	
A. By county and color, 1952 and 1953, by type, 1953 onsets.....	42
B. By year and age, 1953.....	46
C. By year, color, and sex with rates, 1953.....	46
11. Reported Untreated Cases of Lymphogranuloma Venereum (Place of Report)	
A. By county and color, 1952 and 1953, with month of report, 1953	47
B. By year of report and age, 1945-1953.....	49
C. By year of report, color, and sex with rates, 1945-1953.....	50

TABLE OF CONTENTS—Continued

Table	Page
12. Reported Cases of Malaria (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953.....	51
B. By year and age, 1937-1953.....	52
C. By year, color, and sex with rates, 1937-1953.....	53
13. Reported Cases of Measles (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953.....	54
B. By year and age, 1930-1953.....	58
C. By year, color, and sex with rates, 1930-1953.....	59
14. Reported Cases of Meningitis (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953.....	60
B. By year and age, 1930-1953.....	64
C. By year, color, and sex with rates, 1930-1953.....	65
15. Reported Cases of Paratyphoid Fever (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953.....	66
B. By year and age, 1930-1953.....	67
C. By year, color, and sex with rates, 1930-1953.....	68
16. Reported Cases of Poliomyelitis (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953.....	69
B. By year and age, 1931-1953.....	73
C. By year, color, and sex with rates, 1931-1953.....	74
17. Reported Cases of Rocky Mountain Spotted Fever (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953.....	75
B. By year and age, 1932-1953.....	77
C. By year, color, and sex with rates, 1932-1953.....	78
18. Reported Cases of Scarlet Fever (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953.....	79
B. By year and age, 1930-1953.....	83
C. By year, color, and sex with rates, 1930-1953.....	84
19. Reported Cases of Septic Sore Throat (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953.....	85
B. By year and age, 1930-1953.....	87
C. By year, color, and sex with rates, 1930-1953.....	88
20. Reported Cases of Smallpox (Place of Residence)	
A. By year of report and age, 1930-1953.....	89
B. By year, color, and sex with rates, 1930-1953.....	90
21. Reported Untreated Cases of Syphilis (Place of Report)	
A. By county and color, 1952 and 1953, with stage and sex, 1953.....	91
B. By year of report and age, 1930-1953.....	96
C. By year of report, color, and sex with rates, 1930-1953.....	97
D. By color, stage, and sex with rates, 1940-1953.....	98
E. Congenital syphilis, previously untreated, by color showing year of report, 1946-1953 and year of birth, 1925-1953: North Carolina, all report sources.....	102

TABLE OF CONTENTS—Continued

22. Reported Cases of Tetanus (Place of Residence)	
A. By county and color, with month of onset, 1953.....	104
B. By year and age, 1953.....	106
C. By year, color, and sex with rates, 1953.....	107
23. Reported Cases of Trachoma (Place of Residence)	
A. By year of report and age, 1931-1953.....	108
B. By year, color, and sex with rates, 1931-1953.....	109
24. Reported Cases of Tuberculosis, All Forms (Place of Residence)	
A. By county, color, and type, 1952 and 1953, with stage and activity, 1953	110
B. By year of report and age, 1933-1953.....	116
C. By year of report, color, and sex with rates, 1933-1953.....	117
25. Reported Cases of Tularemia (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953..	118
B. By year and age, 1930-1953.....	119
C. By year, color, and sex with rates, 1930-1953.....	120
26. Reported Cases of Typhoid Fever (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953..	121
B. By year and age, 1930-1953.....	123
C. By year, color, and sex with rates, 1930-1953.....	124
27. Reported Cases of Typhus Fever, Murine (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953..	125
B. By year and age, 1930-1953.....	126
C. By year, color, and sex with rates, 1930-1953.....	127
28. Reported Cases of Undulant Fever (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953..	128
B. By year and age, 1932-1953.....	129
C. By year, color, and sex with rates, 1932-1953.....	130
29. Reported Cases of Whooping Cough (Place of Residence)	
A. By county and color, 1952 and 1953, with month of onset, 1953..	131
B. By year and age, 1930-1953.....	134
C. By year, color, and sex with rates, 1930-1953.....	135

INTRODUCTION

The twenty-second bulletin of North Carolina communicable disease morbidity statistics, covering the calendar year 1953, is published as Part I of the Annual Report of the Public Health Statistics Section. Part II, which contains natality and mortality data, will be issued later in the year.

Information regarding the diseases included in this report is shown by date of onset for all diseases except the five venereal diseases, tuberculosis, and amebiasis, which appear by date of report. Reports of all diseases having their onset in 1953 and received during the period January 1, 1953—January 31, 1954, plus unknown onsets received in 1953 are included except for those diseases tabulated by date of report. Data regarding the latter are confined to reports received during 1953, regardless of onset date.

All diseases included in this report are tabulated by place of residence, except the five venereal diseases which are shown by place of report. The venereal disease case reports are allocated to the county of report unless reported by a hospital or institution, in which case they are assigned to the county of residence.

All rates shown are per 100,000 population. Those instances in which counties are not shown in the various tables indicate that no cases were reported.

The disease reports included in these tabulations represent all those cases reported to the State Board of Health by physicians, hospitals and health departments in North Carolina, and of illnesses of North Carolinians diagnosed in other states and reported to the Communicable Disease Control Section under the reciprocal reporting agreement.

The total number of disease reports increased slightly in 1953 over 1952. This increase was due largely to better reporting of certain diseases, namely infectious hepatitis and gastro-enteritis, and due to a moderate increase in the reported incidence of poliomyelitis.

Poliomyelitis cases, totaled 926, an increase over 1952 when 538 cases were reported. Poliomyelitis assumed epidemic proportions in only three localized areas, Caldwell, Catawba and Avery Counties.

Reported malaria dropped from 305 in 1952 to 48 in 1953. All cases upon investigation were found to be of exogenous military origin.

Reported cases of infectious hepatitis increased from 672 in 1952 to 1,130 in 1953.

Diphtheria case reports totaled 130 in 1953 as compared to 202 in 1952. The 1953 rate per 100,000 was 3.1. While improvement in incidence of diphtheria was recorded, the North Carolina rate is still in excess of the average for the United States.

During 1953, case reports included such unusual diseases as leprosy, smallpox, trachoma, trichinosis, botulism and anthrax.

Table 2 shows a summary of reportable diseases in all previous years.

TABLE 1.—ESTIMATED POPULATION OF NORTH CAROLINA BY COLOR AND SEX, 1918-1953*

Year	All classes			White			Other
